ENVIRONMENTAL POLICIES

RM Auto Repairs Ltd TA NRP Autocentre
Unit 4 Wallend Farm, Lower Road, Minster, ME12 3RR
01795 877966 | office@nrpautocentre.uk

Environmental responsibilities, waste and spill procedures

Purpose and application

This policy document provides a practical framework for RM Auto Repairs Ltd TA NRP Autocentre. Read it alongside relevant contracts, risk assessments, customer terms and privacy notices. It does not remove statutory rights; applicable law takes precedence.

Environmental Policy

- Prevent pollution and spills; reduce waste; recycle where practicable; use suitable waste contractors; reduce unnecessary energy and water use; train staff in relevant procedures.

Waste Management and Duty of Care

- Separate and store waste safely in suitable containers. Prevent leaks, windblown waste and unauthorised access.
- Use appropriately authorised waste carriers and receiving sites. Keep waste transfer notes and hazardous-waste records where required.
- Never pour oil, coolant, brake fluid, solvents or chemicals into drains or onto the ground.

Used Oil, Fluids, Batteries and Hazardous Materials

- Keep used oil and vehicle fluids in suitable, closed and labelled containers; prevent contamination and leakage.
- Follow COSHH assessments, safety data sheets, manufacturer instructions and training for oils, solvents, cleaners, batteries and other hazardous substances.
- Store batteries securely and route used batteries, filters and contaminated materials through appropriate waste arrangements.

Spill Response

- Inform management and protect people first. Stop the source only if safe, prevent the substance reaching drains where safe, and use a spill kit only if trained and equipped.
- Keep people away from unsafe areas. Dispose of contaminated absorbents correctly and record significant incidents. Make external notifications where legally required.

Energy, Water and Recycling

- Switch off unnecessary equipment and lighting where safe; report leaks; avoid unnecessary water use.
- Separate suitable scrap metal, tyres, batteries, packaging and other recyclables according to legal requirements and contractor arrangements.
